Veronica,

That sounds likely to be the solution, but I have a call with Dominion in 9 minutes and will get clarity for you.

Quick question....

My dominion tech told me he received an email with the "fix" for the ENR reporting problem. He said the files need to be put on a jump drive from his laptop and then transferred to the EMS. I just need verification from someone on the state level that this is ok, because everything we have been taught for 18+ years is nothing goes into the EMS that does not come secure from CES. Please advise.

Thanks,

**Veronica M. Johnson, CERA**

**Subject:** RE: ENR L&A Test Upload

Here is an update from Michael Barnes regarding this:

Counties are supposed to be using the "GA Export by Precinct" format when generating their export file from RTR. For the PPP, we had asked counties to use the "GA Export by Precinct Portion" format. The "GA Export by Precinct" format is the newest format and the one we used to test and pre-populate the ENR page.

Counties will need to use the GA Export by Precinct format for both the PPP and the GP election data sets. The GP election data set arrived at the county loaded with the GA Export by Precinct format. The GA Export by Precinct format will need to be added to the PPP dataset. Before generating the export file, the proper format needs to be selected in RTR and any other formats de-selected. Once this is done once in the election data set the format will be selected and in place moving forward.

Dominion has sent multiple emails out this morning instructing the local techs on the proper steps to take.

**Subject:** RE: ENR L&A Test Upload

We have been made aware of a formatting issue with the county ENR extract for the June 9<sup>th</sup> Election. Dominion and CES are working on a solution.

**Subject:** ENR L&A Test Upload

Please send the below to your counties. I just made a buzz post. I've attached the reference ENR training materials that you should review so you can assist your counties (and provide if they have trouble finding the document of firefly).

-----

Election Officials,

The Election Night Reporting (ENR) website for the 6/9/2020 Presidential Preference Primary – General Primary Nonpartisan General Election – Special Election is now ready for your county to submit a test upload that contains L&A data. Registered voters do not need to be entered into your EMS for this, but we would like L&A data if you still have an export that contains test data. This will allow us to test the website functionality. If you do not have L&A data, please notify your Liaison and submit a test upload without vote totals (also known as a zero upload). Uploading a zero file is still a useful test of the system.

Please review your county specific ENR page after the upload to ensure that all races are displaying correctly, that all candidates are present, and the votes are assigned to the correct candidates. Once you have completed this review, remember to publish the upload. If you do not publish the upload, we cannot see the work that you have done. Let your Liaison know if you experience an error or notice any display settings that need to be adjusted when attempting your upload. For this election, we will be using the Georgia Export. Please complete this upload as soon as possible, but no later than end of business on Tuesday, June 2<sup>nd</sup>.

The ENR login portal can be accessed through the following link:

[https://admin.enr.clarityelections.com/GA\\_Login.aspx](https://admin.enr.clarityelections.com/GA_Login.aspx)

If you are unfamiliar with the ENR upload process, training materials can be found on Firefly by searching for "Scytl Updated ENR User Guide 2020" or by navigating to Training > ENR Resources and selecting the PDF document titled "Scytl Updated ENR User Guide 2020."

Once we have completed the testing, we will send another message asking you to do a zero upload to clear the L&A data from the site. We will also ask you later in the week to submit zero files for the March PPP election as well.
